**Subject:** Tunney Act

I deplore the kid gloves with which the Tunney act treats Microsoft. In my view, the world is dominated by big business and by government. As our representatives, I expect members of the government to protect the consumer from the whims of the monopolists. Forced upgrade cycles, certification scams, reduced expectations for privacy and security and loss of control of personal property are just a few of the reasons we need to reign in Bill Gates and his cronies.

Sincerely,  
-Elliott Eggleston
